

Perturbation convergence on module 15

lipid export from cell
positive regulation of lipid transport
cell-cell signaling
negative regulation of developmental process
negative regulation of cell development
growth
positive regulation of lipid localization
developmental process involved in reproduction
regulation of lipid transport
reproductive process
steroid metabolic process
regulation of cell growth
energy homeostasis
negative regulation of cell differentiation
lipid transport
regulation of system process
negative regulation of growth
regulation of growth
multicellular organismal reproductive process
regulation of lipid localization
