

Perturbation convergence on module 31

defense response to virus
response to virus
defense response to other organism
innate immune response
response to external biotic stimulus
response to other organism
response to biotic stimulus
defense response to symbiont
biological process involved in interspecies interaction between organisms
immune response
defense response
negative regulation of viral process
response to external stimulus
interferon-mediated signaling pathway
immune system process
regulation of viral process
response to type I interferon
cellular response to type I interferon
antiviral innate immune response
regulation of response to biotic stimulus
