

Perturbation convergence on module 2

regulation of pH
regulation of cellular pH
regulation of intracellular pH
intracellular pH reduction
vacuole organization
vacuolar acidification
regulation of lysosomal lumen pH
vesicle-mediated transport
lysosome organization
lytic vacuole organization
cellular catabolic process
vesicle organization
lysosomal lumen acidification
establishment of localization in cell
macroautophagy
neuron cellular homeostasis
endosome organization
autophagy
process utilizing autophagic mechanism
endosomal transport
