

Perturbation convergence on module 22

cellular response to chemical stimulus
cellular response to oxygen-containing compound
response to oxygen-containing compound
cellular response to nitrogen compound
response to endogenous stimulus
cellular response to endogenous stimulus
cellular response to organic cyclic compound
response to organic cyclic compound
synaptic signaling
response to hormone
cellular response to hormone stimulus
response to lipid
cellular response to lipid
response to nitrogen compound
cell-cell signaling
establishment of endothelial barrier
endothelial cell development
intracellular signal transduction
intracellular receptor signaling pathway
endothelial cell differentiation
